## **Event Summary**

Chandigarh College of Engineering and Technology under the aegis of BIS Standards Club organized a Quiz Competition on 18<sup>th</sup> September 2024. The quiz event aimed to test students' understanding of key IS codes, emphasizing the importance of standardization in civil engineering. Around 60 enthusiastic students from the Civil Engineering branch participated, showcasing their knowledge of essential IS codes, including IS 456:2000, IS 516: Part 1 2021, and IS 383:2016.

Prior to the event, students were provided with a PDF containing detailed information about these codes, allowing them to prepare in advance. The codes covered important aspects of construction, including concrete design, testing methods, and material specifications.

Questions ranged from basic principles to more in-depth technical details, challenging participants to apply their theoretical knowledge practically. Students participated either in teams or individually, responding with enthusiasm and determination. Their answers were evaluated based on accuracy and application of the standards.

After thorough assessment, the winners were declared, marking the end of the competition. The event not only tested the students' knowledge but also emphasized the real-world significance of these IS codes in professional civil engineering practices.

**Following students were declared as winners of the competition:**

Prizes	Winners
First Prize	Divyansh Verma
Second Prize	Suraj Sharma Ansh Hardik Goel
Third Prize	Jashanpreet Singh Sahildeep Singh Dev
Consolation Prize	Gurvir Kaur Nancy Komalpreet Kaur

The event ended with a message of gratitude from the students of BIS club of Chandigarh College of Engineering and Technology towards the BIS officials who helped in the successful completion of this event.

The event was coordinated by Er. Poonam Dhiman, faculty mentor, the Standards club of Chandigarh College of Engineering and Technology.
